## RESEARCH EXPERIENCE

---

2022-2023 Developer for National Nuclear Data Center continuous integration system:  
National Nuclear Data Center (NNDC)  
Brookhaven National Laboratory, Upton NY  
Assistant Scientist (Current Position):

- ADVANCE project to automate all the testing needed for the ENDF/B-VII.1 We quickly realized that the quasi-automated suite could be completely automated and turned into a continuous integration (CI) system.

Software:

- ADVANCE Evaluated Nuclear Data File (ENDF/B)  
<https://www.nndc.bnl.gov/endl-dev/qa/>

2020-2022 Automation of Nuclear Forensics using Synchrotron X-rays  
Nonproliferation and National Security: Detector Systems and Applications  
Brookhaven National Laboratory, Upton NY  
Assistant Scientist:

- Created SnapPy (Synchrotron Network Automation Program in Python) software for using machine learning and synchrotron beamline controls to create non-destructive chemical analysis and elemental maps of environmental samples for nuclear forensics (Python and Qt).
- Automating the workflow for rapidly measuring and producing elemental maps of large-area samples using the Submicron Resolution X-ray Spectroscopy Beamline (SRX) at the National Synchrotron Light Source II, Brookhaven National Laboratory, through a novel combination of supervised and unsupervised machine learning algorithms.

Publications:

- Automation of submicron resolution x-ray spectroscopy measurements and analysis using supervised and unsupervised machine learning algorithms  
[doi.org/10.1117/12.2633459](https://doi.org/10.1117/12.2633459)
- Development of Nuclear Forensics using Synchrotron Radiation-Based Analysis at the National Synchrotron Light Source-II. Proc. LLNL NCV-ASAP-2022
- Development of synchrotron-based analyses of environmental samples. Proc. INMM (2022)

2019-2020 Simulations of X-ray Scattering  
Experimental Development at National Synchrotron Light Source II (NSLS-II)

Brookhaven National Laboratory, Upton NY  
Post-Doc:

- Created Python package to generate randomized 3D samples to simulate actual nano-materials/glass/colloids/etc. that are studied at various beamlines (C++ and Python)
- Set up GPU for simulation processing (CUDA, Imod, Conda, MPI processing).
- Created machine learning algorithm to automatically select propagation parameters for a user input of a beamline sample for the Synchrotron Radiation Workshop software (Reinforcement Learning, SVM, but also attempted instance based kNN).
- Wrote software to access HDF5 x-ray scattering data from beamlines at NSLSII. The software handled: data acquisition from the beamline servers, displaying images and beamline data, adding scaling and image cropping functions (h5py).
- Created simulations of samples for the NSLSII CHX beamline to prepare beamline scientists for future experiments, as well as to verify experimental data (C++, Python, NSLSII BlueSky).
- Created educational video tutorials for the Sirepo Simulation software (Camtasia).

Publications:

2018-2019 Sloan Digital Sky Survey (SDSS-V)  
Imaging Science Laboratory  
Ohio State University, Columbus OH  
Post-Doc:

- Created mechanical and software apparatus for thermometry testing of computer system cold temperature survivability (C++, Python, wagoIO).

Software:

- Centroid Machine Learning Software  
[github.com/racoles/centroiding](https://github.com/racoles/centroiding)

2017-2018 Dark Energy Spectroscopic Instrument (DESI)  
Imaging Science Laboratory  
Ohio State University, Columbus OH  
Post-Doc :

- Analyze DESI Commissioning Instrument images using my custom deep learning metrology software (R and PyTorch).
- Aligned and focused the DESI Commissioning Instrument for use on the DESI telescope by writing and implementing metrology software and procedures (Python with Tkinter GUI).

Publications:

- DESI Commissioning Instrument Metrology

2015-2017 Large Synoptic Survey Telescope (LSST)  
Instrumentation Division  
Brookhaven National Laboratory, Upton NY  
Graduate Researcher:

- Construction of camera LSST camera (CCD sensor installation, electronics, and testing systems).
- Installing and imaging X-ray sources.
- Testing camera readout electronics.
- Focal plane metrology using SmartScope metrology measurements and analysis.
- Develop and maintain LSST Camera Control Software (CCS).
- Construction of backside illuminated CCD camera (CCD sensor installation, electronics, and testing systems).
- Construction of quantum efficiency testing apparatus for LSST CCDs.

- Mechanical design and construction of electro-optical hardware, and programming.
- CCD handling.
- General clean room and CCD handling experience.
- Perform residual gas analysis (RGA) on LSST cryostats.
- Frequently use vacuum and cryo systems, and have experience in designing systems that use such equipment.

Publications:

- LSST: from Science Drivers to Reference Design and Anticipated Data Products

2011-2013 Baryon Oscillation Spectroscopic Survey (BigBOSS)  
Microsystems Laboratory  
Lawrence Berkeley National Laboratory, Berkeley CA  
Graduate Researcher:

- Identified limitations and redesigned quantum efficiency testing apparatus to fit BigBOSS CCDs.
- Design and installation of X-ray sources for system calibration.
- Construction of quantum efficiency testing apparatus for LSST CCDs.
- Experience in vacuum, optics, electronics, and cryo systems, and frequent CCD handling.
- On programming team for the quantum efficiency testing apparatus automation,
- Developed a program to map the quantum efficiency of BigBoss CCDs (IDL).

Publications:

- CCD Research and Development at Lawrence Berkeley National Laboratory  
[doi.org/10.1117/12.926606](https://doi.org/10.1117/12.926606)

2008-2011 Wayne State University  
Department of Physics and Astronomy  
Detroit MI  
Scientific Analyst:

- Supernova data analysis.
- Wrote programs that use principle component analysis to reduce supernova data (R).
- Built and maintained a Beowulf scientific server to provide computing resources for the university's physics department.

Software:

●Supernova Principle Component Analysis  
[sites.google.com/view/sdsspca](https://sites.google.com/view/sdsspca)

- 2008      Tevatron Particle Accelerator  
Particle Accelerator Division  
Fermilab, Batavia IL  
Particle Accelerator Technician:
- Performed stabilization measurements on quadruple and dipole magnets in the Tevatron Particle Accelerator.
- 2007      Supernova Acceleration Probe (SNAP)  
Particle Astrophysics Division  
Fermilab, Batavia IL  
Science Associate:
- Programmed and tested voltage regulating board prototype FRIC0 (Fermilab Regulator Integrated Circuit).
- 2006      Sloan Digital Sky Survey (SDSS)  
Particle Astrophysics Division  
Fermilab, Batavia IL  
National Science Foundation (NSF) Associate:
- Organized spectroscopic data on supernova candidates.
  - Created a mysql database and web application to host supernova candidate data.

## PROGRAMING LANGUAGES

---

Frequently used programming languages:

Python, Java, C++, MATLAB, Qt, COBOL (for personal projects)

General experience programming languages:

IDL, R, C, Mathematica, SQL, PHP

Documenting languages:

YAML, L<sup>A</sup>T<sub>E</sub>X, Sphinx, SLAC eTraveler, Confluence, JIRA, Jupyter Notebook

## RELATED PROFESSIONAL SKILLS

Certified Analyst for BlueDragon Hyper-Integrated Causal Analysis Problem Solving Methodology:  
[bluedragon-hca.com](http://bluedragon-hca.com)

CAD Software:  
Autodesk Inventor, SolidWorks, OpenSCAD

Video Recording and Editing Software:  
Camtasia, Filmora

3D printers:  
Fablicator, Makerbot, MakerGear, Anet A8, FlashForge

3D printing and model rendering software:  
Cura, Flashprint, Autodesk Meshmixer, Simplify3D, 3DF Zephyr

Optical design software:  
Zemax

Entrepreneurial Training for Department of Energy Researchers:  
Opportunity Analysisiologist training in PSW-lite
