EDUCATION

2016 Ph.D. Physics
Department of Physics and Astronomy
Wayne State University

2012 M.S. Physics
Department of Physics and Astronomy
Wayne State University

2007 B.S. Physics (Minor in Mathematics)
Department of Physics and Astronomy
Wayne State University

GRANTS AND AWARDS

2026 Brookhaven National Laboratory Spotlight Award
Awarded for converting ML1-ML3 machine learning and AI servers for use in the NX Department
Award: $700

2025 Brookhaven National Laboratory Spotlight Award
Awarded for development of the Review and Release (R&R) site, database, and automation
Award: $700

2024 Department of Energy Grant: Open Access Datasets for Artificial Intelligence-Enabled Safeguards
Principle Investigator
Brookhaven National Laboratory
Award: FY24 $250k
Term length: 1 year

2023-2024 Department of Energy Grant: Ethics and AI
Principle Investigator
Brookhaven National Laboratory
Award: FY23 $168k
Award: FY24 $168k
Term length: 2 years

2023-2024 Department of Energy Grant: Bench-top X-ray Particle Analysis
Principle Investigator
Brookhaven National Laboratory
Award: FY23 $143k
Award: FY24 $125k
Term length: 2 years

2024 Brookhaven National Laboratory Grant (LDRD-C): Synchrotron-Based System to Triage Environmental Samples
Principle Investigator
Brookhaven National Laboratory
Award: FY24 $50k
Term length: 1 year

2023 Brookhaven National Laboratory Spotlight Award
Awarded for hosting BNL Cyber Expo 2023
Award: $1000

2015 Department of Energy Grant: Office of Science Graduate Student Research (SCGSR)
Brookhaven National Laboratory
Award: $36k + $4k for travel
Term length: 12 months
science.osti.gov/wdts/scgsr

2014 American Association of Physics Teachers Award (Gustafson Memorial)
Wayne State University
Award: $750
clas.wayne.edu/physics/news/category/awards

RELEVANT FIRST AUTHOR PUBLICATIONS

RESEARCH EXPERIENCE

2025-2026 AI-Enabled Safeguards and Nuclear-Analog Data:
Brookhaven National Laboratory, Upton NY
Staff Physicist, Principal Investigator:

- Led work on open-access datasets and AI applications for nuclear safeguards, including the development of a roadmap for responsible data acquisition, management, and access.
- Supervised and mentored students working on AI ethics, safeguards applications of AI/ML, and data preparation for deep learning in safeguards.
- Developed and submitted proposals on AI-enabled surveillance, including deep learning for surveillance-camera image review and benchmarking foundation models for nuclear-surveillance object detection.

Publications:
•IE2Video: Adapting Pretrained Diffusion Models for Event-Based Video Reconstruction
https://arxiv.org/abs/2512.05240
•Event-Conditioned Video Generation via Pretrained Diffusion Models
https://openreview.net/forum?id=MzE8GkUAPv

2025-2026 National Nuclear Data Center (NNDC) Continuous Integration and Automation:
Brookhaven National Laboratory, Upton NY
Staff Physicist:

- Advanced CI/CD workflows for nuclear-data quality assurance using GitLab pipelines, Docker, and Kubernetes.
- Presented work on ADVANCE continuous integration at the NCSP Technical Program Review and contributed to nuclear-data software planning and code integration.

Publications:
•ENDF/B-VIII.1: Updated Nuclear Reaction Data Library for Science and Applications
https://doi.org/10.1016/j.nds.2026.04.001

2025-2026 Review and Release (R&R) Site and Automation:
Brookhaven National Laboratory, Upton NY
Staff Physicist:

- Developed the Review and Release site, its database, and supporting automation for the Brookhaven National Laboratory document Review and Release process.
- Presented the R&R system to laboratory leadership and currently in use laboratory wide.

2024 Open Access Datasets for Artificial Intelligence-Enabled Safeguards:
Brookhaven National Laboratory, Upton NY
Staff Physicist, Principle Investigator (Current Position):

- Developed a comprehensive framework that addresses the technical, ethical, and logistical challenges inherent to data access and management in the safeguards community. Significant achievements included the establishment of principles for ethical data acquisition, strategies for scalable and secure storage, and an actionable guide for improving data accessibility among stakeholders. I bridged gaps between technical requirements and regulatory constraints, paving the way for responsible AI-enabled innovations. By synthesizing survey insights and workshop findings, I provided a structured plan that fosters collaboration and ensures adherence to privacy, security, and licensing standards, thereby enhancing the reliability and robustness of AI applications in nuclear safeguards.

2023-2024 Ethics and AI:
Brookhaven National Laboratory, Upton NY
Staff Physicist, Principle Investigator (Current Position):

- Developed ethical guidelines for applying artificial intelligence to International Atomic Energy Agency (IAEA) Safeguards. These considerations revolve around aspects such as bias and fairness, transparency and explainability, accountability, governance, and privacy. Currently I am

further validating the ethical AI framework and identified its potential implementation through a phased approach, making it valuable for the IAEA's mission.

2023-2024 Bench-top X-ray Particle Analysis:
Brookhaven National Laboratory, Upton NY
Staff Physicist, Principle Investigator (Current Position):

- Developed bench-top X-ray devices and software tailored for nuclear forensics applications, integrating these instruments into the sub-micron beamlines at NSLS-II. The accompanying software uses both supervised and unsupervised machine learning techniques to streamline and automate the workflow.
- My investigation primarily emphasized X-ray Fluorescence (XRF) to achieve precise elemental analysis of particles. The primary objective is to discern minor components through elemental analysis, which serves as a crucial tool for establishing the origin of a specimen. Additionally, I explored supplementary capabilities, such as high-resolution radiography, which can provide morphology details about larger particles. Furthermore, I incorporated X-ray Diffraction and X-ray Absorption techniques into our automated software.

Publications:
•Development of Nuclear Forensics using Synchrotron Radiation-Based Analysis at the National Synchrotron Light Source-II
https://resources.inmm.org/annual-meeting-proceedings/development-nuclear-forensics-using-synchrotron-radiation-based-analysis

2023-2024 Machine Learning for Real-Time Video Authentication:
Brookhaven National Laboratory, Upton NY
Staff Physicist:

- Developed an innovative, all-encompassing video authentication model capable of identifying various manipulation techniques, even those not encountered during training.
- My model excelled at recognizing forged videos altered through a range of methods, such as deep learning, traditional image processing, lens tampering, and splicing.
- Produced and curated a specialized datasets, incorporating diverse video manipulation techniques.

Publications:
• Leveraging Customized Training Datasets for Authentication of Surveillance Camera Videos in Warehouse Environments

https://rresources.inmm.org/annual-meeting-proceedings/leveraging-customized-training-datasets-authentication-surveillance

2022-2024 Developer for National Nuclear Data Center Continuous Integration System:
National Nuclear Data Center (NNDC)
Brookhaven National Laboratory, Upton NY
Staff Physicist (Current Position):

- ADVANCE project to automate all the testing needed for the ENDF/B-VII.1 We quickly realized that the quasi-automated suite could be completely automated and turned into a continuous integration (CI) system.
- Added automated data output to ENDF/B-VII.1 GitLab Wikipedia repositories for completed jobs and pipelines (GitLab API)

Publications:
• Progress towards the ENDF/B-VIII.1 release
doi.org/10.1051/epjconf/202429404004

Software:

2020-2022 Automation of Nuclear Forensics using Synchrotron X-rays
Nonproliferation and National Security: Detector Systems and Applications
Brookhaven National Laboratory, Upton NY
Staff Physicist:

- Created SnapPy (Synchrotron Network Automation Program in Python) software for using machine learning and synchrotron beamline controls to create non-destructive chemical analysis and elemental maps of environmental samples for nuclear forensics (Python and Qt).
- Automating the workflow for rapidly measuring and producing elemental maps of large-area samples using the Submicron Resolution X-ray Spectroscopy Beamline (SRX) at the National Synchrotron Light Source II, Brookhaven National Laboratory, through a novel combination of supervised and unsupervised machine learning algorithms.

Publications:
• Automation of submicron resolution x-ray spectroscopy measurements and analysis using supervised and unsupervised machine learning algorithms
doi.org/10.1117/12.2633459
• Development of Nuclear Forensics using Synchrotron Radiation-Based Analysis at the National Synchrotron Light Source-II. Proc. LLNL NCV-ASAP-2022

• Development of synchrotron-based analyses of environmental samples. Proc. INMM (2022)

2019-2020 Simulations of X-ray Scattering
Experimental Development at National Synchrotron Light Source II (NSLS-II)
Brookhaven National Laboratory, Upton NY
Post-Doc:

- Created Python package to generate randomized 3D samples to simulate actual nano-materials/glass/colloids/etc. that are studied at various beamlines (C++ and Python)
- Set up GPU for simulation processing (CUDA, Imod, Conda, MPI processing).
- Created machine learning algorithm to automatically select propagation parameters for a user input of a beamline sample for the Synchrotron Radiation Workshop software (Reinforcement Learning, SVM, but also attempted instance based kNN).
- Wrote software to access HDF5 x-ray scattering data from beamlines at NSLSII. The software handled: data acquisition from the beamline servers, displaying images and beamline data, adding scaling and image cropping functions (h5py).
- Created simulations of samples for the NSLSII CHX beamline to prepare beamline scientists for future experiments, as well as to verify experimental data (C++, Python, NSLSII BlueSky).
- Created educational video tutorials for the Sirepo Simulation software (Camtasia).

Publications:
• Analysis of Hard X-Ray Focusing by 2D Diamond CRL
doi.org/10.1117/12.2568980
• Simulations of Coherent Scattering Experiments at Storage Ring Synchrotron Radiation Sources in the Hard X-Ray Range

beta.sirepo.com/srw#/simulations

2018-2019 Sloan Digital Sky Survey (SDSS-V)
Imaging Science Laboratory
Ohio State University, Columbus OH
Post-Doc:

- Created mechanical and software apparatus for thermometry testing of computer system cold temperature survivability (C++, Python, wagoIO).

Software:
•Centroid Machine Learning Software
github.com/racoles/centroiding

2017-2018 Dark Energy Spectroscopic Instrument (DESI)
Imaging Science Laboratory
Ohio State University, Columbus OH
Post-Doc :

- Analyze DESI Commissioning Instrument images using my custom deep learning metrology software (R and PyTorch).
- Aligned and focused the DESI Commissioning Instrument for use on the DESI telescope by writing and implementing metrology software and procedures (Python with Tkinter GUI).

Publications:
•DESI Commissioning Instrument Metrology
doi.org/10.1117/12.2312592
•The Commissioning Instrument for the Dark Energy Spectroscopic Instrument
doi.org/10.1117/12.2312885

Software:
•DESI Metrology software
github.com/racoles/DESI_CI_MET

2015-2017 Large Synoptic Survey Telescope (LSST)
Instrumentation Division
Brookhaven National Laboratory, Upton NY
Graduate Researcher:

- Construction of camera LSST camera (CCD sensor installation, electronics, and testing systems).
- Installing and imaging X-ray sources and testing camera readout electronics.

- Focal plane metrology using SmartScope metrology measurements and analysis.
- Develop and maintain LSST Camera Control Software (CCS) along side construction of backside illuminated CCD camera (CCD sensor installation, electronics, and testing systems).
- Construction of quantum efficiency testing apparatus for LSST CCDs, including mechanical design and construction of electro-optical hardware, and programming.
- Perform residual gas analysis (RGA) on LSST cryostats, including use of vacuum and cryo systems, and experience in designing systems that use such equipment.

Publications:
•LSST: from Science Drivers to Reference Design and Anticipated Data Products
iopscience.iop.org/article/10.3847/1538-4357/ab042c

Software:
•Metrology software
github.com/racoles/RSA_Metrology
•CCD surface debris detection software
github.com/racoles/lint

2011-2013 Baryon Oscillation Spectroscopic Survey (BigBOSS)
Microsystems Laboratory
Lawrence Berkeley National Laboratory, Berkeley CA
Graduate Researcher:

- Identified limitations and redesigned quantum efficiency testing apparatus to fit BigBOSS CCDs.
- Design and installation of X-ray sources for system calibration.
- Construction of quantum efficiency testing apparatus for LSST CCDs.
- Experience in vacuum, optics, electronics, and cryo systems, and frequent CCD handling.
- On programming team for the quantum efficiency testing apparatus automation,
- Developed a program to map the quantum efficiency of BigBoss CCDs (IDL).

Publications:
•CCD Research and Development at Lawrence Berkeley National Laboratory
doi.org/10.1117/12.926606

2008-2011 Wayne State University
Department of Physics and Astronomy
Detroit MI
Scientific Analyst:

- Supernova data analysis.
- Wrote programs that use principle component analysis to reduce supernova data (R).
- Built and maintained a Beowulf scientific server to provide computing resources for the university's physics department.

Software:
•Supernova Principle Component Analysis
sites.google.com/view/sdsspca

2008 Tevatron Particle Accelerator
Particle Accelerator Division
Fermilab, Batavia IL
Particle Accelerator Technician:

- Performed stabilization measurements on quadruple and dipole magnets in the Tevatron Particle Accelerator.

2007 Supernova Acceleration Probe (SNAP)
Particle Astrophysics Division
Fermilab, Batavia IL
Science Associate:

- Programmed and tested voltage regulating board prototype FRIC0 (Fermilab Regulator Integrated Circuit).

2006 Sloan Digital Sky Survey (SDSS)
Particle Astrophysics Division
Fermilab, Batavia IL
National Science Foundation (NSF) Associate:

- Organized spectroscopic date on supernova candidates.
- Created a mysql database and web application to host supernova candidate data.

PROGRAMING LANGUAGES

Frequently used programming languages:
Python, Java, C++, MATLAB, Qt, COBOL (for personal projects)

General experience programming languages:
IDL, R, C, Mathematica, SQL, PHP

Documenting languages:
YAML, LaTeX, Sphinx, SLAC eTraveler, Confluence, JIRA, Jupyter Notebook

RELATED PROFESSIONAL SKILLS

Certified Analyst for BlueDragon Hyper-Integrated Causal Analysis Problem Solving Methodology:
bluedragon-hca.com

CAD Software:
Autodesk Inventor, SoldWorks, OpenSCAD

Video Recording and Editing Software:
Camtasia, Filmora

3D printers:
Fablicator, Makerbot, MakerGear, Anet A8, FlashForge

3D printing and model rendering software:
Cura, Flashprint, Autodesk Meshmixer, Simplify3D, 3DF Zephyr

Optical design software:
Zemax

Entrepreneurial Training for Department of Energy Researchers:
Opportunity Analysisiologist training in PSW-lite

CONFERENCE ACTIVITY AND SYMPOSIUMS

2026 Institute of Nuclear Materials Management (INMM) Annual Meeting
Panel 56: The Need for Improved Integration of Nuclear Data and Material Control and Accounting Communities
Panelist

2026 NCSP Technical Program Review
ADVANCE Continuous Integration and Automated Analysis for ENDF
Presenter (talk)

2026 Institute of Nuclear Materials Management (INMM) Annual Meeting
Event-Based Surveillance Data Collection for AI Training in a Nuclear-Analog Facility
Presenter (talk)

2025 NCSP Technical Program Review
Continuous Integration for ADVANCE
Presenter (talk)

2025 Nonproliferation and International Nuclear Safeguards in a Changing World (NINS) Course
NSLS-II and Environmental Sampling
June 25, 12:30–13:15
Presenter (talk)
bnl.gov/ninscourse

2024 Nuclear Data Week
ADVANCE Software: Feature and Code Integration Priorities
Presenter (talk)

2023 Institute of Nuclear Materials Management (INMM) Atoms for Peace and Global Nonproliferation
Second Annual INMM and ESARDA Joint Annual Meeting, Vienna, Austria
Guest Presenter (talk)
https://resources.inmm.org/annual-meeting-proceedings/development-nuclear-forensics-using-synchrotron-radiation-based-analysis

2022 Association of Materials-Centric Engineers and Scientists (ASM) Joint Meeting with the American Nuclear Society (ANS)
Association of Materials-Centric Engineers and Scientists (ASM) Conference, New York
Invited Speaker (talk)
http://DoL1.eng.sunysb.edu/asm/

2022 SPIE Optical Engineering + Applications: Applications of Machine Learning 2022
Conference 12227, San Diego
Guest Presenter (talk)
doi.org/10.1117/12.2633459

2021 Synchrotron Radiation-Based Capabilities in Support of the Nuclear Forensics and Nonproliferation Mission
International Atomic Energy Agency Conference, New York
Guest Presenter (Interview)
https://vimeo.com/brookhavennationallab/review/567881200/98232dfd5a

2021 Consortium for Monitoring Technology and Verification
University of Michigan, Michigan

Guest Presenter (talk)
mtv.engin.umich.edu

2019 Gordon Research Conferences for X-Ray Science
Stonehill College: Easton, Massachusetts
Presenter (poster)
grc.org/x-ray-science-conference/2019

2019 National Synchrotron Light Source II (NSLS-II) Seminar
Brookhaven National Laboratory (BNL): Upton, New York
Guest Speaker (talk)
bnl.gov/nsls2/seminars

2018 Particle, Astro, and Nuclear Physics Seminar (PAN)
Wayne State University: Detroit, Michigan
Guest Speaker (talk)
clas.wayne.edu/physics/seminars/pan

2018 SPIE Astronomical Telescopes + Instrumentation
Austin, Texas
Presenter (talk)
spie.org/conferences-and-exhibitions/past-conferences-and-exhibitions/astronomical-instrumentation-and-telescopes-2018

2016 Precision Astronomy with Fully Depleted CCDs (PACCD)
Brookhaven National Laboratory (BNL): Upton, New York
Presenter (poster)
bnl.gov/paccd2016

2016 American Astronomical Society (AAS) 227th Conference
Kissimmee, Florida
Presenter (poster)
aas.org/meetings/aas227

2015 LSST Project and Community Workshop
Bremerton, Washington
lsst.org/news/events

2008 Baryon Acoustic Oscillations (BAO) Telescope Conference
Fermilab: Batavia, Illinois
Host (assistant)
cerncourier.com/a/conference-probes-the-dark-side-of-the-universe

2007 Gravitations Lensing Conference
Fermilab: Batavia, Illinois
Host (assistant)
astro.fnal.gov/events/conferences

TEACHING EXPERIENCE

2014 Astronomy: Graduate Teaching Assistant

2009-2013 Electrodynamics: Graduate Teaching Assistant

SERVICE TO PROFESSION

2020-2065 Mentor in Science Undergraduate Laboratory Internship program, Oak Ridge Institute for Science and Education, and BNL Mentorship Program for Early Career Staff

- 2024-2026: Early Career Staff Mentor

ORISE Mentor:
- Summer 2026: Event-Based and Frame-Based Camera Systems for Nuclear Monitoring
- Fall 2025: Data for Deep Learning for Safeguards
- Summer 2025: AI/ML in Safeguards
- Spring 2025: Conduct of Operations for AI Ethics

SULI Mentor:
- Fall 2024: Machine Learning for Video Authentication
- Summer 2024: Ethics in AI
- Spring 2024: Machine Learning in Nuclear Forensics
- Fall 2023: Ethics in AI
- Summer 2023: Machine Learning in Nuclear Forensics
- Fall 2022: Cluster Analysis Testing
- Spring 2022: Synchrotron Image Analysis
- Fall 2021:Synchrotron Image Analysis
- Spring 2021:Data Parsing for Analysis
- Summer 2020: Simulation of Experiments

2023-2026 APEX Project (2023, 2024, 2025, 2026)
For one week in June, the U.S. Department of Energy's Brookhaven National Laboratory site became a scientific facility in the mythical country of 'Freedonia.' There, a team of inspectors, analysts and technical specialists from the International Atomic Energy Agency (IAEA) participated in a training class/exercise in order to assure the absence of undeclared nuclear material and activities in Freedonia. This one-week on-site exercise was the field component of a two-week training course that took place both on Long Island and

in Vienna, Austria. The annual training exercise, known as the Additional Protocol Exercise, or APEX, was built and carefully designed in a joint effort with the safeguards training section of the IAEA.

2023, 2024 Scholarly Partnership in Nuclear Security (SPINS) Oral Presentations
Three talks at the Scholarly Partnership in Nuclear Security (SPINS) consortium to enhance the development of the next-generation technical workforce of underrepresented minority men and women.
• Basic Information That Engineers and Scientists Should Know About AI and ML
• Nuclear Forensics and Machine Learning (ML) at the National Synchrotron Light Source II (NSLS-II)
• My Career Path to Working in the Nonproliferation and National Security Department

2019-2021 Department of Energy's CyberForce Competition (Brookhaven National Laboratory)
Cyber defense competitions to exercise interactive and scenario-based events.
• 2021 (Red Team)
• 2020 (Red Team)
• 2019 (Red Team)
cyberforcecompetition.com

2017 STEM-Prep Summer Institute (Brookhaven National Laboratory)
Presentation Title: LSST and the History of Dark Energy and Dark Matter
bnl.gov/education/programs

2016 Girls Inc. (Brookhaven National Laboratory)
Presentation Title: LSST and the Universe
bnl.gov/newsroom/news.php?a=213027

2016 Science National Laboratory Day (Washington DC)
Presentation Title: Big Data for LSST
bnl.gov/newsroom/news.php?a=26331

2015 PubSci: The Dark Universe (Brewology Pub in Long Island, New York)
Presentation Title: The Dark Universe
bnl.gov/pubsci

2015 Custer Observatory (Long Island, New York)
Presentation Title: Dark Matter and Dark Energy
